

# Water Weekly

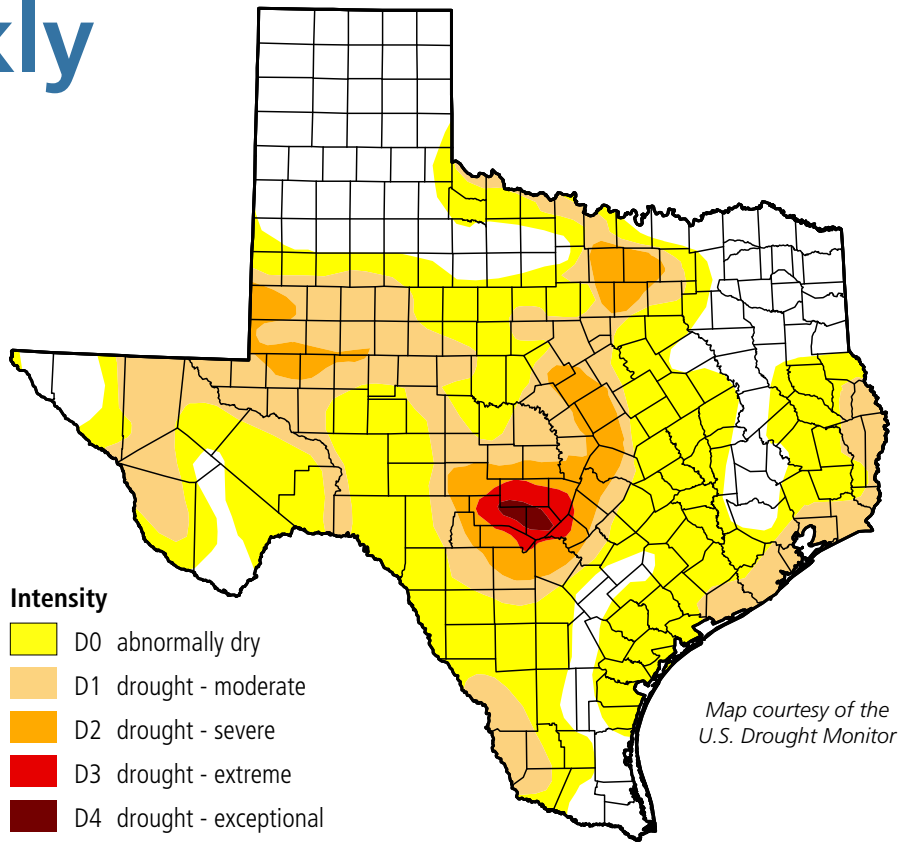

For the week of 07/17/23

## Water conditions

The area of the state impacted by drought increased for the fourth consecutive week. In the last week, drought was eliminated from the Panhandle but re-emerged in South Texas and expanded in other parts of the state. Nearly 40 percent of the state remains vulnerable to drought in the coming weeks.

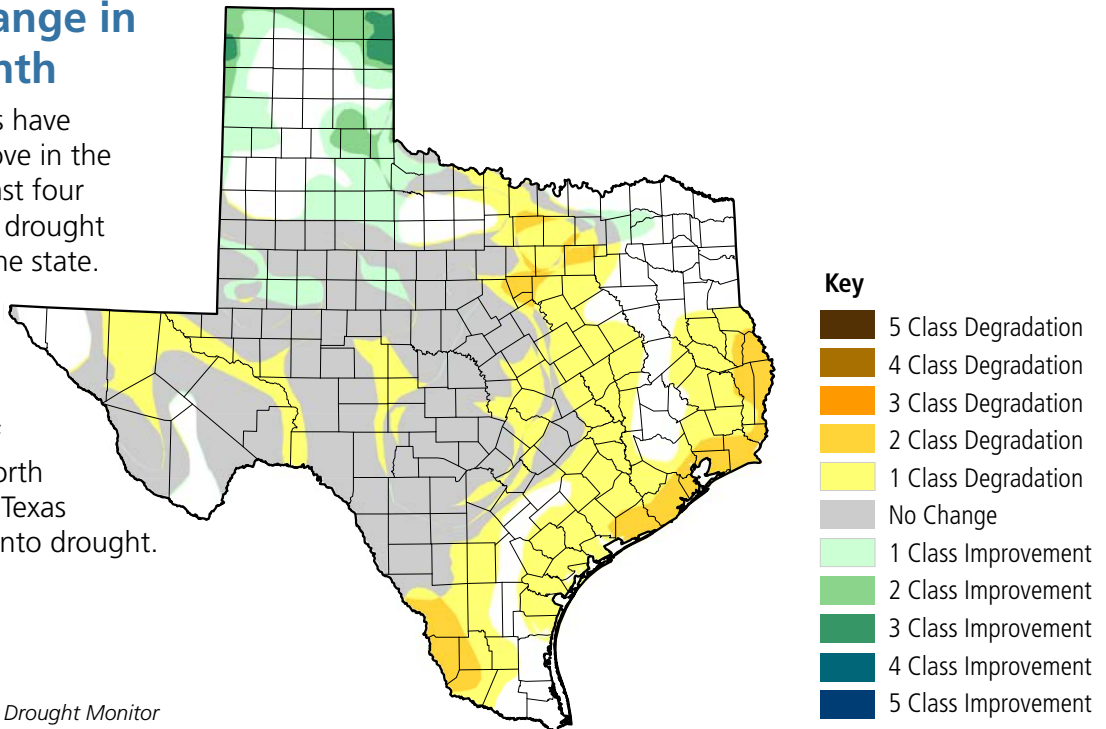

## Drought conditions

- ◆ 31% now
- ◆ 27% a week ago
- ◆ 59% three months ago
- ◆ 94% a year ago

## Drought change in the last month

Drought conditions have continued to improve in the Panhandle in the last four weeks, eliminating drought from that part of the state. But drought remains firmly entrenched in Central and West Texas. And parts of the upper coast, north central, and South Texas have slipped back into drought.
