

## MAJOR MUNICIPAL RESERVOIR SYSTEM STORAGE

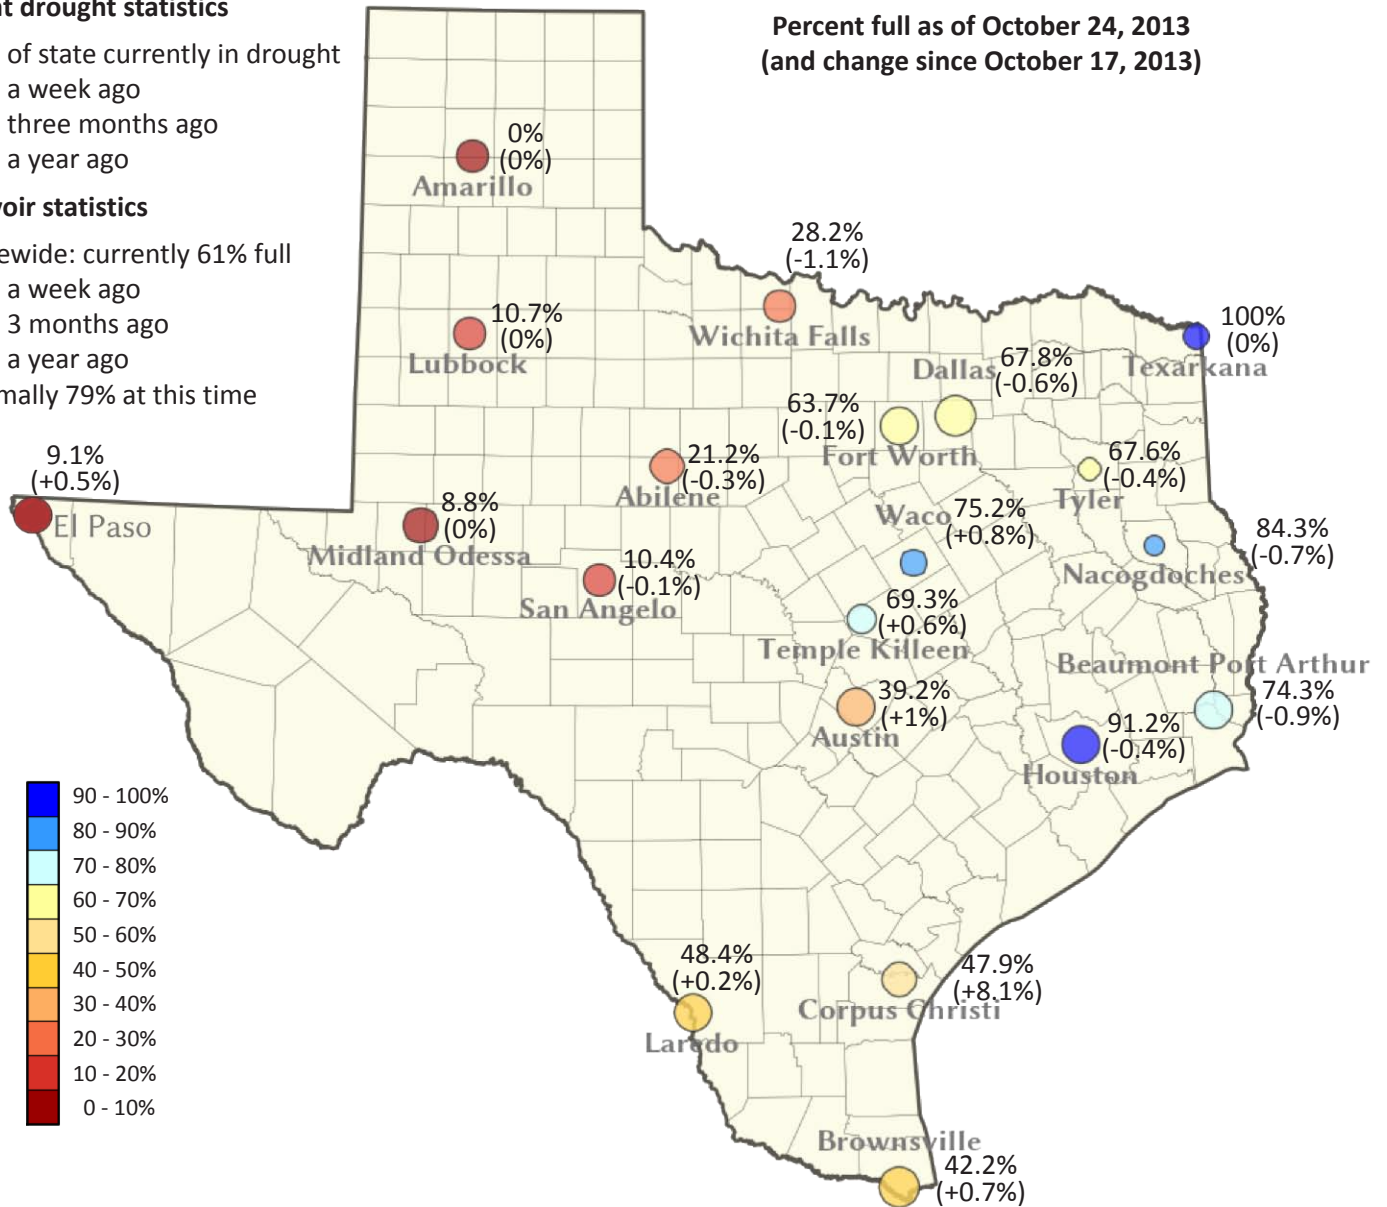

As we enter the fall and winter, we're starting to see a reversal in reservoir trends with a slight uptick in storage that brings us to just above 60 percent full. And for the first time since February, we are not setting new 20-year lows for water in our reservoirs for the time of year. Nevertheless, reservoir levels continue to be low in west, south, central, and north-central parts of the state.

### Current drought statistics

- 87% of state currently in drought
- 91% a week ago
