

DROUGHT CONDITIONS

According to the latest U.S. Drought Monitor, less than one percent of Texas is now in drought with a tiny lingering patch of drought in the Texas Panhandle. Although statewide reservoir storage levels are nearly normal, reservoirs in West and South Texas continue to be below normal for this time of year.

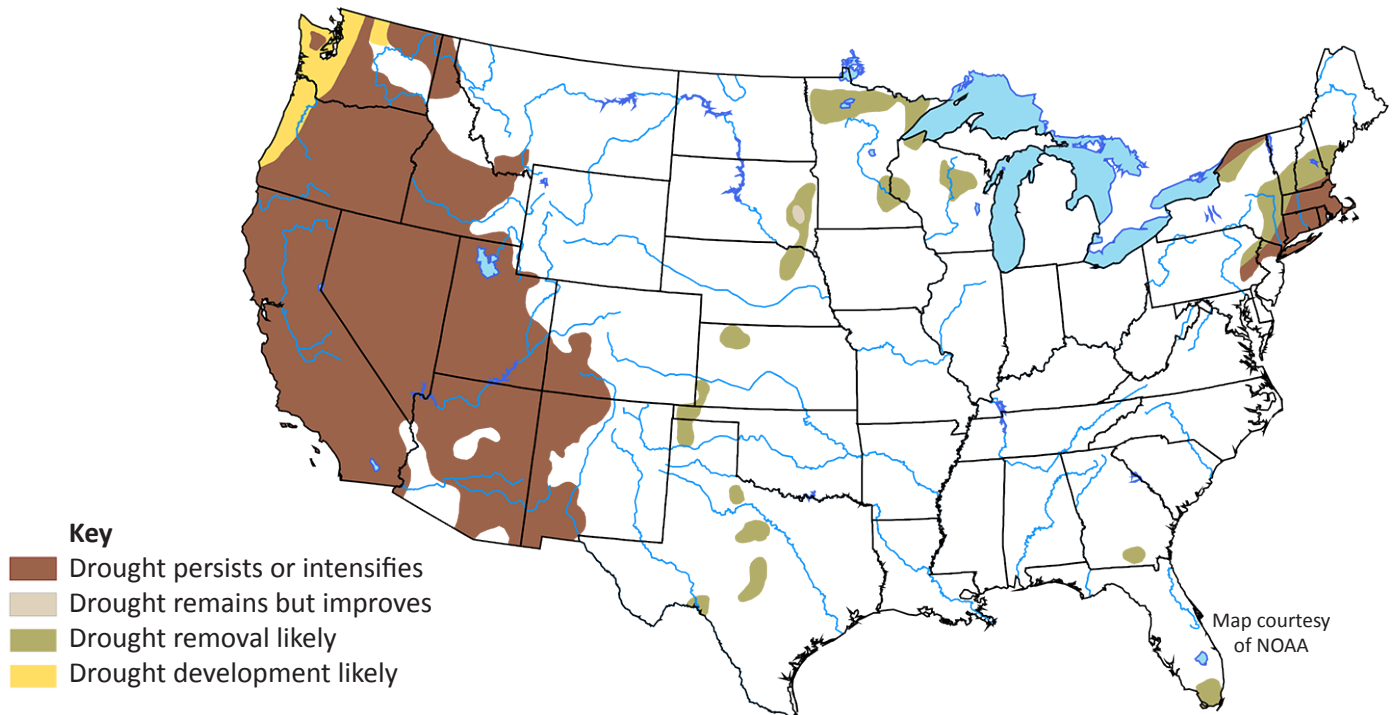

Drought statistics

- 1% of state currently in moderate to exceptional drought
- 5% a week ago
- 43% three months ago
- 68% a year ago

U.S. MONTHLY DROUGHT OUTLOOK

The U.S. Monthly Drought Outlook suggests the removal of drought conditions in Texas by the end of June.
