

**WATER CONDITIONS**

Little to no change in drought conditions over the past week with less than 1 percent of the state in drought. In general, reservoir conditions are good for much of the eastern half of the state but low in the western half. For example, Lake Nacogdoches filled over the past week, but San Angelo’s reservoirs continue to decline.

**Drought conditions**

- 0.61% now
- 0.61% a week ago
- 25% three months ago
- 44% a year ago

**U.S. SEASONAL DROUGHT OUTLOOK**

The latest seasonal drought outlook projects that Texas will probably be drought-free by the end of February.
