

Water Weekly

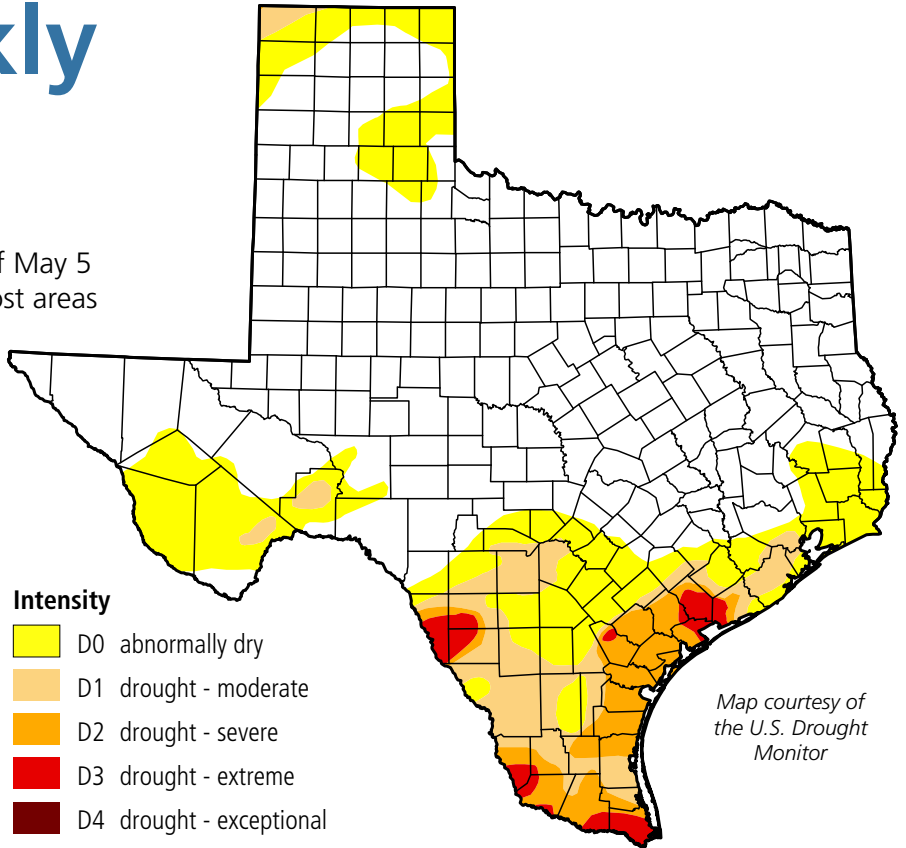

For the week of 05/11/20

Water conditions

The latest drought map for conditions as of May 5 shows a one-category improvement for most areas along the upper coast. Conditions continued to dry out in other parts of the state. Overall, moderate or worse drought was down three percentage points from the previous week.

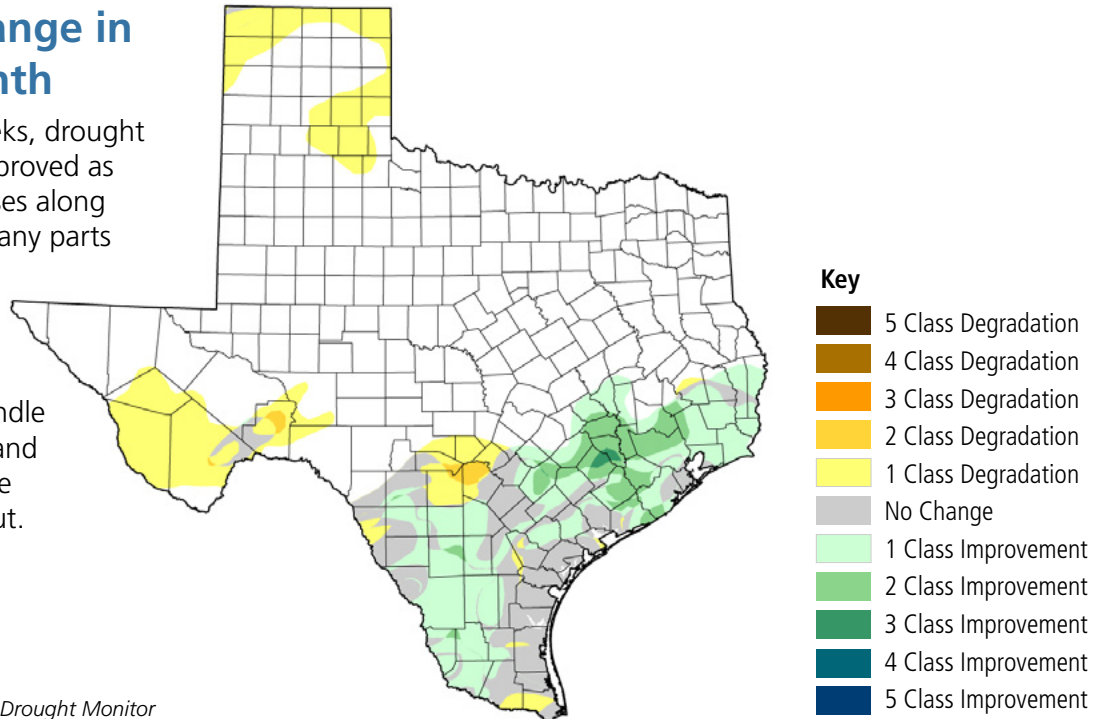

Drought conditions

- ◆ 13% now
- ◆ 16% a week ago
- ◆ 33% three months ago
- ◆ 0% a year ago

Drought change in the last month

In the last four weeks, drought conditions have improved as much as three classes along the upper coast. Many parts of South Texas have also seen one class of improvement. But areas of the Panhandle and central, west, and far south Texas have continued to dry out.
