

Water Weekly

For the week of 03/11/24

Water conditions

This is the latest drought map for conditions as of March 5. For the second consecutive week, the area of the state impacted by drought was unchanged while the area considered susceptible to drought in the next few weeks, shown in yellow on the map, expanded a few percentage points.

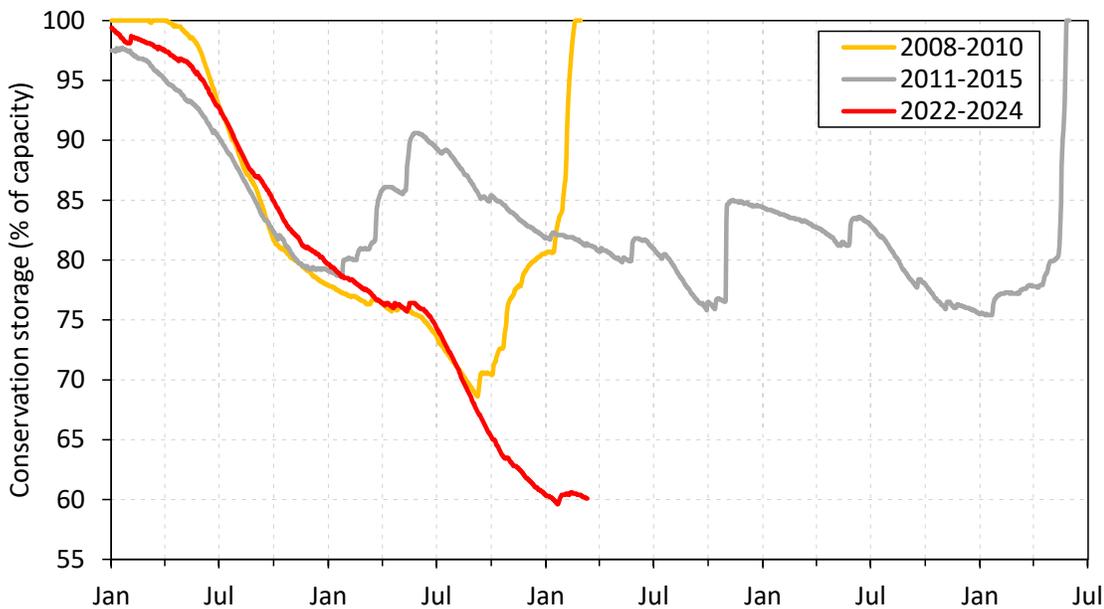

Drought conditions

- 23%** now
- 23%** a week ago
- 43%** three months ago
- 64%** a year ago

Intensity

- D0** abnormally dry
- D1** moderate drought
- D2** severe drought
- D3** extreme drought
- D4** exceptional drought

Canyon Lake storage

Since 1990, Canyon Lake on the Guadalupe River has experienced three extended low-storage periods. Conservation storage reached a low of 68.6 percent of capacity in September 2009, 75.4 percent in January 2015, and current storage is hovering around 60 percent.
