

Water Weekly

For the week of 04/01/24

Water conditions

The latest drought map for conditions as of March 26 shows a less than one percentage point increase in the area of the state impacted by drought. In the last week, drought disappeared from East Texas but re-emerged in the northeast corner of the Panhandle.

Drought conditions

24% now

24% a week ago

39% three months ago

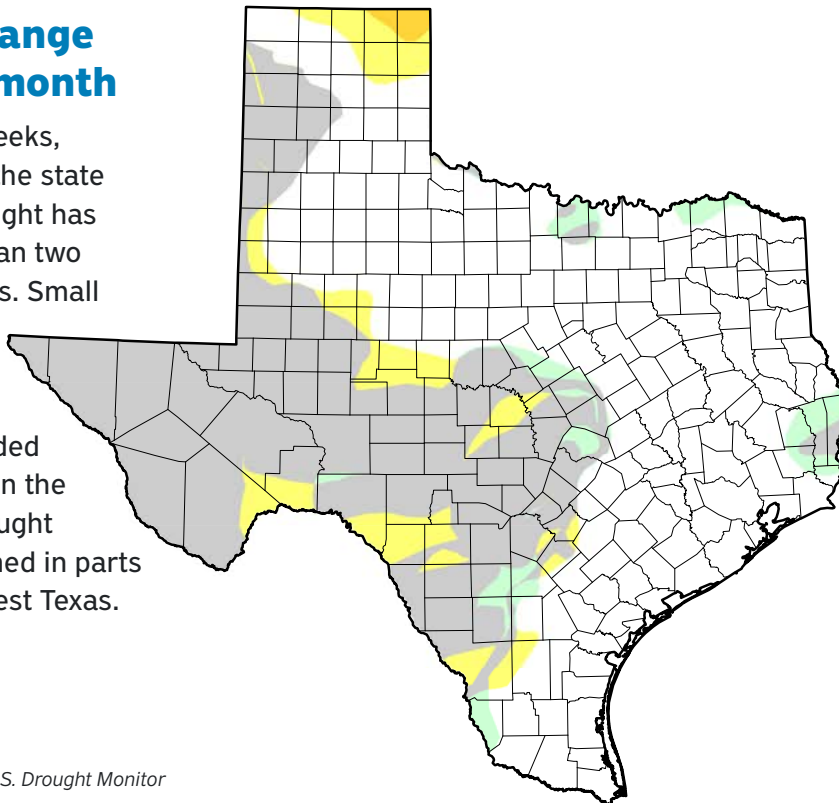

67% a year ago

Intensity

- **D0** abnormally dry
- **D1** moderate drought
- **D2** severe drought
- **D3** extreme drought
- **D4** exceptional drought

Drought change in the last month

In the last four weeks, the total area of the state impacted by drought has expanded less than two percentage points. Small improvements in the eastern half of the state have been exceeded by degradations in the western half. Drought remains entrenched in parts of Central and West Texas.
