

# Water Weekly

For the week of 06/10/24

## Water conditions

The latest drought map for conditions as of June 4 shows a decrease in drought from the previous week. Weekly changes have been small for most of 2024. In the last ten weeks, drought has expanded five weeks and contracted five weeks with a net increase of one percentage point.

Map courtesy of the U.S. Drought Monitor

## Drought conditions

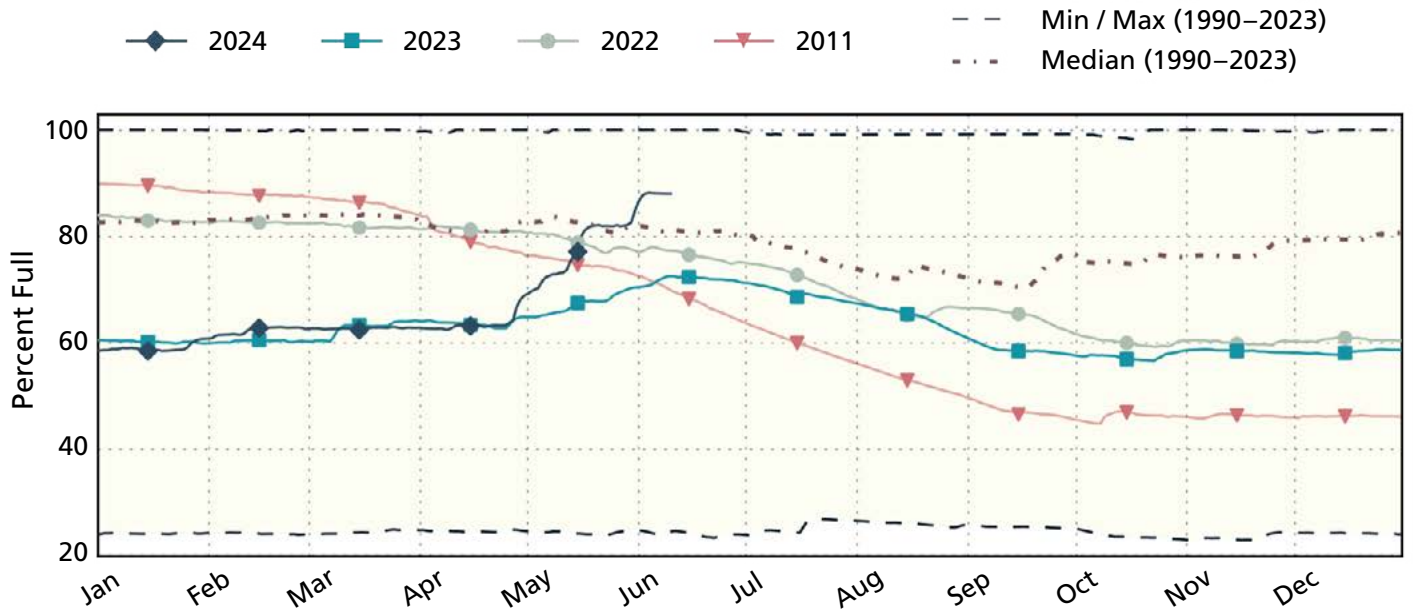

- 26% now
- 26% a week ago
- 23% three months ago
- 28% a year ago

## Intensity

- D0** abnormally dry
- D1** moderate drought
- D2** severe drought
- D3** extreme drought
- D4** exceptional drought

## Wichita Falls storage

After being more than 20 percentage points below normal for the time of year, surface water supplies for Wichita Falls recently recovered. Since last fall, Waco and Temple-Killeen have seen similar recoveries. Meanwhile, systems for Austin, Brownsville, Corpus Christi, and Laredo remain 20 percentage points or more below normal.
